

Exceptional Service

We recognize how important mealtime is to our customers' overall satisfaction with Providence Place. Our approach is to use familiar recipes and prepare them well.

Trained Chefs

The majority of our menu items are prepared from scratch in our kitchens by trained chefs. Some of Providence Place's signature items include the homemade soup du jour and dessert cart with assorted cakes, pies, and ice cream.

New Experiences

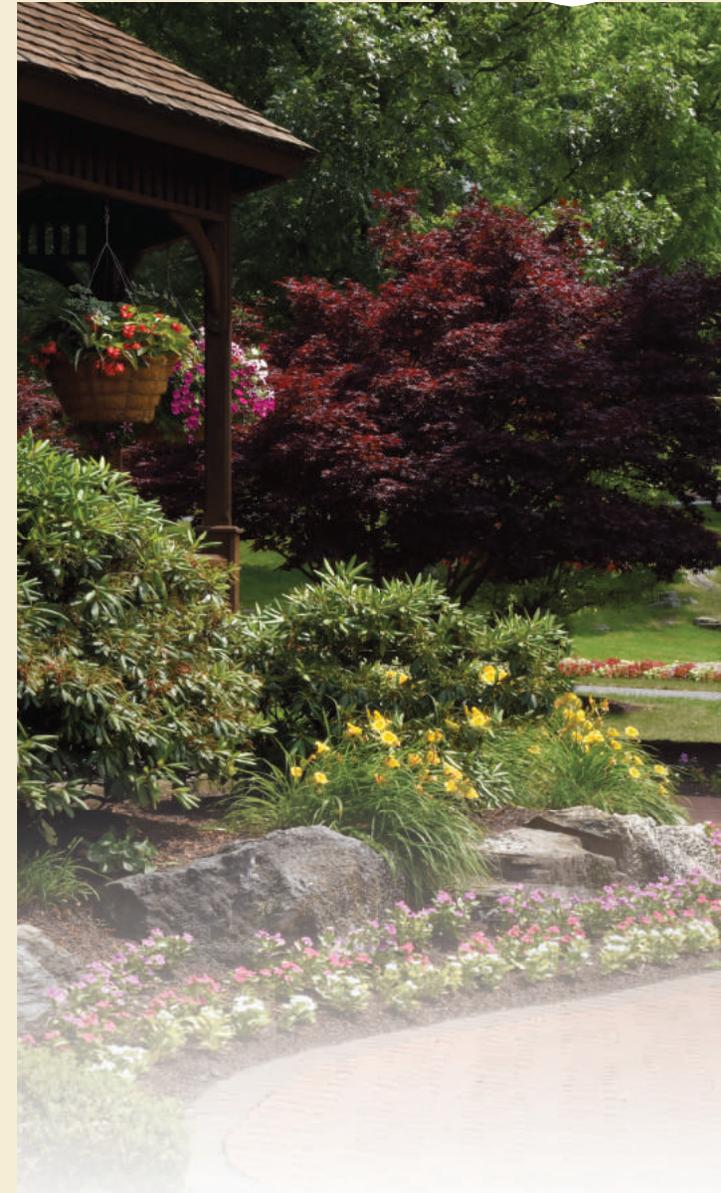

Through a vibrant community life program, our focus is on keeping life interesting and enjoyable. In addition to our dedicated team members, we hire outside professionals who lead discussions, instructional classes, and workshops. A variety of club and committee meetings are scheduled to ensure that Providence Place's activity and menu offerings are interesting and appealing.

By listening to and responding to our residents, we continually find ways to add meaning to their lives.

 **Providence Place**
SENIOR LIVING

Comfortable, Friendly, and Homelike

Our thoughtfully designed communities are attractively decorated and comfortably furnished to create an environment that feels like home to our residents. Relationships are especially important to us so we have created a community which fosters friendship and a sense of belonging.

Affordably Priced

We want to be the best value in senior living without sacrificing our standards for quality. Our activities and dining programs provide residents with an outstanding quality of life at an affordable price.

Aging in Place

Providence Place offers multiple levels of care and a variety of support services designed to maximize a resident's stay. This model allows seniors to age in place with the least amount of disruption to their lives.

Make the choice to enhance your lifestyle by living among a community of friends.

Peace-of-Mind

Independent Living is an attractive lifestyle option for seniors who don't require on-going assistance with their personal care or health care but find reassurance in community living. Providence Place residents can maximize their independence by living in a safe and supportive community with other seniors.

- Help is always available in the event of an emergency
- Have as much or as little help as you want with housekeeping and laundry
- Stop worrying about costly home maintenance
- Enjoy life more
- Create new friendships
- Participate in a wide range of stimulating activities

Spending time with others who share similar interests makes life more meaningful.

Personalized Care

We recognize that each individual is unique. That's why we customize our approach to delivering care. Each resident has his or her own personalized support plan so they receive just the right amount of assistance with their daily needs. One-on-one support is available to help residents be more successful with everyday activities. Providence Place has a compassionate team of caregivers, or Resident Life Associates, who take the time to learn residents' routines and preferences. Whether we're providing help with bathing, meals, dressing, or medication, we provide the right level of support while encouraging residents to retain as much independence as they choose.

Nurturing

Providence Place takes a holistic approach to supporting residents with memory loss. This means we engage our residents in physical, social, cognitive and spiritual activities that are both meaningful and enjoyable. We provide customized care and programs by offering separate programs for different stages of dementia. This method ensures that residents receive the right level of memory support at the right time without sacrificing their independence.

Residents living with mild memory loss are eligible to enroll in our **Connections Club program**. The Club provides additional structure, daily reminders, and small group activities.

Providence Place's **Connections Neighborhood** is thoughtfully designed for those residents with moderate to late stage Alzheimer's, or a related disorder. This is a secure, homelike setting that meets our residents' needs for safety and security. Staff who work in the Connections Neighborhood receive extensive training on providing specialized dementia care.
